

We want your grizzles, groans, gripes, and complaints

Not entirely satisfied with the City of Melville's performance? Then please tell us your grizzles, groans, gripes and complaints.

We can't promise to fix them all but in combination everyone shares a stronger voice and achieves better benefits.

Shadow Council is under construction. We are volunteers in the City of Melville District, establishing for engaging with and benefit of, the City and Council to assist our community achieve legislative compliance through:

- Community-respectful local government planning and administrative; policy, procedures and practice;
- functional community engagement-participation in local government affairs and decisions;
- accountability of the local governments to the community;
- sustainable efficiency and effective community beneficial governance.

Despite a recent flood of new employees, draining away your rates; administrative governance-of, within or from the City of Melville Local Government has not been seen to materially improve. Even February 2nd's Electors General Meeting was not standards compliant. The Council's, Governance, and Audit, Risk and Improvement Committees are themselves not compliant. If the administration can't demonstrate compliance, then what are the chances of their practices being compliant? A watchful community is paramount.

Shadow Council believe the most useful persons are those who complain because they have found the faults that need fixing and what's more, they know how to fix them.

It is past time for the community to step up and bring their local government to account.

If you would like to volunteer with, or connect to our team, please add your voice to our growing community caring movement by sending your contact details to:
